Village Saran UC Dabhro

**Uzair Karamat
Humaira Hayat
Misbah Karamat**

C/O OLD ASSOCIATES OF KINNAIRD SOCIETY (OAKS)

Project Location and Description

The Project is located 60 km from Mithi Village Saran UC Dabhro.

Scope of Work

Following rehabilitation work has been done:

- Internal repairing of cemented rings with diameter of 7 ft, with thickness of 1 ft under the ground level of dug well.
- Water holding tank alongside the well
- Solid bricks with sufficient cement.
- Soil (Retti & Bajri) for plaster.
- External plaster of walls with thickness of minimum 1 inch all over well.
- Plaque in appreciation of donors (1.5 x 2 marble)
- High grade Iron grader & Steel for pillars.
- Wooden pulley with NTN bearing.
- Crash stone for floor base with proper rolling
- Construction of 2 pillars

Project Benefits

- By rehabilitation life of well is increased
- The time and labour of the community to fetch water will be decreased.
- The rehabilitation of project and management had been done by the community; therefore the ownership will be established.
- Rehabilitation of the well is beneficial for villagers as well as their livestock.
