Water Conservation Guidelines

Voluntary Public Awareness Campaign

Water Conservation at Schools

SCHOOL WATER CONSERVATION & MANAGEMENT SYSTEM

1. **Appoint** a person in school to take on water conservation responsibilities and ensure them
2. **Institute** daily end of the day checking, of all water fixtures to ensure they are closed tight and there is no leakage
3. **Ensure** regular maintenance and repair of all water infrastructure
4. **Institute** periodic water audits
5. Involve school children in water audits and water conservation behavior
6. **Send** Household Water Conservation Guidelines home with children
7. **Arrange** for reuse of water harvested from the atmosphere within the school

CONSERVING WATER IN WORK AREAS & KITCHEN / CANTEEN AREAS

1. Close all taps tightly after use
2. Soak and wash utensils using two sinks rather than directly under the tap

CONSERVING WATER IN GARDEN/YARD/PLAYGROUND SPACES

1. Use hand held watering can or spray and do not use pipe or hose
2. Water garden in morning or evening, when it is cooler and water is more easily absorbed
3. Use a refillable water bottle. At the end of the day, any leftover water can be poured onto the garden

CONSERVING WATER IN BATHROOM

1. Do not keep tap running while washing, put signs to remind students to do the same
2. Replace single-flush toilets with dual-flush toilets
